Full-Stack Developer & Agentic AI Developer | React/Next.js, TypeScript, Tailwind CSS, Python, Node.js, FastAPI

Specializing in modern, responsive and scalable web applications alongside AI-powered agent systems Experienced in e-commerce platforms, authentication systems, CMS-driven applications and end-to-end full-stack development Skilled in API integration, state management, performance optimization, AI agents, multi-agent workflows, LLM integrations, RAG systems and vector databases like Qdrant Proficient with GitHub, Vercel, Netlify, MongoDB, Firebase and modern AI development tools

Tech Stacks

- **Frontend:** React, Next.js, HTML5, CSS3, JS, TS, Tailwind CSS, Vite, React Router, Redux Toolkit, Context API, Axios, Tanstack Query, SWR, React Hook Form, Zod, Shadcn/UI, Framer Motion, GSAP, Responsive Design, Rest API Integration
- **Backend & APIs:** Node.js, Express.js, Python, FAST API, Mongo DB, PostgreSQL, Firebase, JWT Auth, Rest APIs, WebHooks, SSR, Qdrant (Vector Database)
- **AI & Automation:** SpecKit Plus, OpenAI SDK, Agentic AI, AI Agents, Multi-Agent Systems, Rag System, Chainlit, Prompt Engineering, AI Chatbot, AI Voice Agents, Workflow Automation, Business Automation Claude Code, Gemini CLI
- **Data & Analytics:** NumPy, Pandas, Matplotlib, Seaborn, EDA (Exploratory Data Analysis), Data Processing, Reporting Systems, Analytics Dashboard
- **Testing:** Jest, React Testing Library, Unit testing, Component testing
- **Tools & Deploy:** Git, GitHub, Vercel, Netlify, Postman, Streamlit

Technical Experience

- **Freelance Full Stack Developer** | *Self-Employed (Remote)*
6+ months of hands-on experience delivering full-stack web applications, AI-powered agents, multi-agent systems, and workflow automation solutions for real-world business needs
- **Full Stack Intern** | *The Quick Logic (Remote)*
6-month internship gaining hands-on experience in full stack development Assisted in building web applications and APIs

Real-World Challenges & Achievements

- *BWA Hackathon (Winner)* — Built an AI-driven system and secured first position through innovative execution
- *SMIT Hackathon* — Developed a data analysis system that processes input data and generates meaningful insights in real time
- *Marketplace Builder 2025* — Developed a production-ready full-stack marketplace in a 7-day hackathon
- *Google ADK Workshop* — Gained hands-on experience building AI-powered applications using Google ADK tools and workflows
- *Course Companion FTE* — Built a 24/7 autonomous AI tutor using Spec-Kit Plus

Ongoing Work and Focus

- Designing and developing AI-powered automation solutions focused on Agentic AI systems that enhance efficiency and decision-making.
- Building intelligent autonomous agents and multi-agent workflows that execute complex tasks with minimal human intervention

Key Projects

- *LuxuTick E-commerce Platform* — Built a full-stack e-commerce application with admin dashboard, product management and authentication system
- *Restaurant Website* — Created a responsive website with optimized layout and seamless user experience
- *AI Companies Dataset* — Structured and analyzed a dataset of AI companies for insights and exploration
- *Smart Assistant App* — Developed an AI-based assistant to automate tasks and improve productivity
